

AUTOMOTIVE INTELLIGENCE SUMMIT

JULY 24-26, 2018 • RALEIGH, NC

The Automotive Intelligence Summit aims to bring the automotive, tech and finance industries together to analyze new trends, inspect what's on the horizon, determine a course for the road ahead and build lasting relationships to thrive in this brave new world. Our agenda highlights the diversity of topics facing us all, from attitudes on personal car ownership to using AI and machine learning to streamline debt collection and determine

consumer intent, and it's this wide range of discussion that's attracted some of the most prominent players in the corporate arena to this inaugural event. AIS presents the perfect opportunity to learn how different sectors approach technological advance and disruption, formulate a strategy for what's ahead, gain actionable insights from thought leaders in multiple industries and, of course, network with representatives from household names.
