

The inaugural Automotive Intelligence Summit, held in Raleigh, N.C. in 2018, brought together innovators from all corners of the auto industry and represented the intersection between the Auto, Tech and Finance industries.

We invited the best fintech minds of today. We hosted experts in cybersecurity. And we heard from entrepreneurs leading the companies that are improving the end-user experience and disrupting auto industry norms. Ultimately, AIS brings together individuals that are changing the game and ushering the auto industry into the next era — an era driven by mobility, connectivity, big data, analytics, AI, machine learning and more.

We understand that progress and evolution requires collaboration. That’s why AIS offers speakers, sponsors and attendees the opportunity to discuss the next big idea — or ideas — in an environment that fosters productive networking, celebrates the industry’s latest achievements, and helps form what’s next for the OEMs, finance leaders, tech innovators and more.

We hope you will join us this July 23-25 once again in Raleigh, N.C., for AIS 2019. What’s next for auto? The ball is firmly in our court.

Automotive Intelligence Summit
